

# Quickstart Guide

## MilliKey™ MH-4 Response Box

Default MilliKey MH-4 Button to Keyboard Key Mappings

Thank you for choosing MilliKey.

The MilliKey MH-4 is a 1000 Hz USB Response Box that generates standard keyboard events when buttons are pressed.

## Initial Set Up

### ■ Keyboard

The MilliKey is automatically detected as a 1000 Hz USB HID keyboard when connected to a Windows, macOS, or Linux computer. Start collecting standard keyboard data, it is that simple.

### ■ Serial

MilliKey response boxes also optionally utilize a 1000 Hz USB Serial interface, which is plug-and-play on Windows 10, macOS, and Linux. If using Windows 7 please install the required USB Serial driver from:
